WHY IS THIS INFORMATION BEING GIVEN TO THE COMMITTEE?

This information update has been provided to the Operational Management Committee because the loss of the cost sharing payment and the outcome of the waste review will result in amendments to waste management and recycling policy and service delivery at Fylde. The County Council, the waste disposal authority, have made the decision to remove the current cost sharing arrangements which is a payment made to the Districts as the waste collection authority for the separation of recyclable material. The financial impact is a loss of £765,000 per annum to Fylde Council that is highlighted a significant future risk in the Medium Term Financial Strategy. The Council has accepted this is a corporate risk and the purpose of the waste review is to investigate options that will reduce the financial impact of the risk. Members should note that if the County led waste review is unsuccessful or abandoned then the Council will have to carry out its own review of the collection service arrangements with the objective of reducing the cost of the service.
